Job Title: Summer Internships

Location: Bozeman, Montana (may require some travel)

About Us: We are a 100% employee-owned multi-disciplinary engineering company dedicated to delivering innovative and sustainable engineering solutions. Our team is composed of industry leaders who are passionate about making a positive impact on the world.

Job Description: AESI is seeking motivated summer interns to gain hands-on experience in civil engineering, geotechnical engineering, water resources, and land surveying. As an intern, you will work alongside experienced professionals, contributing to real-world projects that shape infrastructure, environmental solutions, and land development. These opportunities provide potential exposure to multiple disciplines, allowing you to develop practical skills, enhance your technical knowledge, and explore potential career paths.

Key Responsibilities (for Engineer/Survey):

- Utilize software and calculations to assist in design of engineering projects.
- Assist in the preparation of construction documents, including plan sets and design specifications, as assigned and overseen by professional engineers.
- Assist in the preparation of reports as assigned and overseen by professional engineers.
- Perform field tasks including but not limited to construction observation, inspection and testing, site visits, test pit logging, percolation testing, and groundwater monitoring.
- Assist survey field crews with land survey related tasks.
- Perform other tasks to support company and project goals and team objectives.

Qualifications:

- Pursuing a degree in Civil Engineering or Land Surveying or a related field.
- Excellent computer and technical skills. Proficiency in Microsoft Office Suite (Word and Excel minimum) preferred.
- Exposure to Autodesk Civil3D, ESRI, or other design software preferred.
- High level of personal responsibility, accountability, and analytical aptitude.
- Quality-oriented and willing to work on a variety of engineering and land surveying related projects.
- Interpersonal skills to meet and communicate effectively (both written and verbal) with managers, fellow employees, contractors, and clients.
- Positive attitude and professional bearing.

What We Offer:

- Competitive compensation.
- Opportunities for professional growth and development.
- A collaborative and inclusive work environment.
- The chance to work on exciting and impactful projects.
- Holiday pay if the holiday falls within the term of employment.

How to Apply: Interested candidates are invited to submit their resume and cover letter to hr@alliedengineering.com with the subject line "Summer Intern Application."
